

BINGHAMTON SUMMER COLLEGE TEST DRIVE COLLEGE LIFE!

Binghamton Summer College (BSC) is a fantastic way to get a preview of college life, delve into interesting topics taught by professors, gain insight and advice about the college admission process, and participate in just-for-fun activities.

This two-week pre-college program provides an early college experience for academically talented high-school students who have completed their sophomore or junior year.

Binghamton Summer College will take place Sunday, July 16 through Friday, July 28, 2017.

SO MANY REASONS TO SPEND YOUR SUMMER AT BINGHAMTON!

You'll have the opportunity to:

- immerse yourself in courses such as "Intro to Engineering," "Business Foundations and Leadership Academy," "Speech and Debate," "Behind the Scenes at the Museum" and "How to Be a Writer," taught by distinguished Binghamton faculty;
- live in Binghamton's modern residential halls;
- meet other talented high-school students;
- explore the local community;
- learn about the college admission process and financial aid.

HOW TO APPLY

1. Complete an online application at binghamton.edu/admissions/summer-college
2. Ask your high school counselor to submit the following items:
 - High school transcript
 - Record of any college aptitude test (PLAN, PSAT, ACT, SAT). This information can be included on the high school transcript.
 - Letter of recommendation

All items must be postmarked by May 1 and mailed to:

Binghamton Summer College
Binghamton University
Undergraduate Admissions Office
P.O. Box 6001
Binghamton, NY 13902-6001 USA

Rolling admission to BSC begins mid-April. The total cost to attend is \$1,500 (includes room and board).

CHOOSE FROM FIVE DIFFERENT TRACKS! EACH PROGRAM WILL RUN FOR TWO WEEKS.

BUSINESS FOUNDATIONS AND LEADERSHIP ACADEMY

Shelley Dionne, associate professor

The business and leadership program offers students the opportunity to explore challenges current and future leaders encounter in a competitive global business environment. This program introduces students to core business concepts in areas such as accounting, marketing, entrepreneurship and operations. Students will develop problem-solving and effective decision-making skills through a series of management case competitions and business simulations.

INTRO TO ENGINEERING

Koen Gieskes, lecturer

Intro to Engineering is a program designed for students who are seeking to experience life in a lab surrounded by state-of-the-art engineering software and equipment. Students will engage in hands-on projects, such as designing and building an interactive game with Arduino, a popular microcontroller.

HOW TO BECOME A WRITER

Barrett Bowlin, lecturer

In this program, students will be exposed to the idea of what it means to be a writer through reading, drafting and critiquing creative works. Learn about contemporary authors and the different genres of creative writing – fiction, poetry, creative nonfiction and drama – as you craft your ideas into manuscripts that we'll workshop together in small groups. At the end of the two weeks, you'll have the chance to hear your fellow students read their polished works aloud in an in-class performance.

SPEECH AND DEBATE

Joseph Leeson-Schatz, director of debate

Students enrolled in the speech and debate program will learn to form, research and deliver arguments through a variety of different styles. The course is designed to be challenging and interesting to those who are familiar with or new to debating. By the end of the program, students will be better able to deliver and write speeches, research and prepare arguments, as well as navigate the information overload that comes with debating in the age of the internet. This will prepare students not only for competitive debate in both high school and college, but also will provide the basic skills necessary to succeed in future careers.

BEHIND THE SCENES AT THE MUSEUM

Pamela Smart, associate professor

Our exploration of museums will be built on a series of field trips to area museums. We'll talk with curators, designers and education programmers to learn how they work together to develop an idea and translate it into the three-dimensional form of an exhibition, creating an experiential environment for visitors. We'll work with the collection of the University Art Museum to try our hand at designing our own exhibits too!
